

Endress+Hauser breaks new ground

Additional production and office space planned in Nesselwang, Germany

Endress+Hauser is expanding its center of competence for temperature measurement technology in Nesselwang, Germany. The global market for high-end products is constantly growing, making the expansion necessary. “We wish to continue our investment and production in Germany,” underlined Managing Director Harald Hertweck.

The new building is required due to the introduction of new products, the overall optimization of production and the continuously growing workforce. “Expansion of our production and office space will help secure long-term growth,” explained Harald Hertweck. Endress+Hauser Wetzler GmbH+Co. KG is going to invest a total of 10 million euros in the new building with a total floor space of 4,800 square meters.

Plans for the new building also involved the optimization of production processes. Operations were restructured and modernized based on the ‘one-piece flow’ principle, making them significantly more efficient. This makes it possible to increase the efficiency and transparency of production processes. As a result, expensive machinery and equipment can be used far more economically in the future.

Sustainable architecture

The modern industrial architecture of the new building is clearly in evidence: the downward sloping facade has the advantage that it offers protection from the sun while the large glass panes at the front allow sufficient natural light in for those working in production. Power from the photovoltaic system to be installed on the roof of the building can be fully used for production processes. The construction project will mainly be carried out by regional companies.

Endress+Hauser Wetzler GmbH+Co. KG

The competence center for temperature measurement, temperature engineered solutions and system products has its headquarters in Nesselwang, Germany. Established in 1872, the company has been part of the Endress+Hauser Group since 1976. The production center employs a workforce of more than 650 worldwide, 360 of which work in Nesselwang. Divisions in Pessano, Italy, Greenwood/Indiana, USA, Suzhou, China, Benoni, South Africa and Aurangabad, India guarantee customer proximity with products and services.

The Endress+Hauser Group

Endress+Hauser is a global leader in measurement instrumentation, services and solutions for industrial process engineering. The Group employs 13,000 personnel across the globe, generating net sales of more than 2.1 billion euros in 2015.

Structure

With dedicated sales centers and a strong network of partners, Endress+Hauser guarantees competent worldwide support. Our production centers in 12 countries meet customers' needs and requirements quickly and effectively. The Group is managed and coordinated by a holding company in Reinach, Switzerland. As a successful family-owned business, Endress+Hauser is set for continued independence and self-reliance.

Products

Endress+Hauser provides sensors, instruments, systems and services for level, flow, pressure and temperature measurement as well as analytics and data acquisition. The company supports customers with automation engineering, logistics and IT services and solutions. Our products set standards in quality and technology.

Industries

We work closely with the chemical, petrochemical, food & beverage, oil & gas, water & wastewater, power & energy, life science, primaries & metal, renewable energies, pulp & paper and shipbuilding industries. Endress+Hauser supports its customers in optimizing their processes in terms of reliability, safety, economic efficiency and environmental impact.

History

Founded in 1953 by Georg H Endress and Ludwig Hauser, Endress+Hauser has been solely owned by the Endress family since 1975. The Group has developed from a specialist in level measurement to a provider of complete solutions for industrial measuring technology and automation, with constant expansion into new territories and markets.
